Lecture Presentation Video Phylum: Mollusca The lophotrochozoan phylum Mollusca includes 100.000 Manual The body of a mollusc Segmentation main parts that vary in A muscular foot, us for movement most of the internal organs · A mantle, a fold of tissue that drapes over the visceral mass and secretes a shell (if present)

meaning foot

Spoken Text

"...a nudibranch can be called a gastropod they ride on a muscular stomach foot you have the bivalves which have the two shells on both sides and then you have the cephalopods where the muscular foot is actually in the head and so that's why it named this way 'lo' meaning head and 'pod' meaning foot now the other things that they have is the visceral mass which contains mostly internal organs.."
